

WALTER MELENDEZ

DATA ANALYST | BUSINESS INTELLIGENCE | OPERATIONS ANALYTICS

Wildwood, FL | 352-418-4981 | wm8770@gmail.com | [Portfolio](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Data Analyst with a B.S. in Computer Science and hands-on experience transforming complex Salesforce, contact-center, and operational data into reliable reporting, Tableau dashboards, automated workflows, and decision-ready insights. Advanced experience with SQL Server, Python, Excel, Power Query, Tableau, data validation, reconciliation, and process automation. Skilled at translating ambiguous business questions into reproducible analyses and communicating findings to directors, senior leaders, and cross-functional stakeholders.

TECHNICAL SKILLS

Analytics & BI: SQL, SQL Server, SSMS, Tableau Desktop, Tableau Prep, Tableau Server, Advanced Excel, Power Query

Programming & Automation: Python, VBA, workflow automation, reusable reporting logic, data cleaning and transformation

SQL & Data: Joins, CTEs, window functions, deduplication, date-window logic, validation, reconciliation, auditing

Business Analytics: KPI reporting, trend analysis, lead-funnel analysis, contact-center analytics, agent performance, workforce and scheduling analysis

Platforms & Tools: Salesforce CRM data, Git/GitHub, Jira, Microsoft 365

PROFESSIONAL EXPERIENCE

Admissions Operations Analyst | Full Sail University | 2024-Present

- Own recurring and ad-hoc operational reporting from metric definition and source-data validation through SQL analysis, Tableau visualization, and presentation of findings to leadership.
- Develop and maintain SQL Server queries using joins, CTEs, window functions, deduplication, and date-window logic across Salesforce and contact-center datasets.
- Build and maintain Tableau dashboards and reporting that surface lead-funnel trends, transfer activity, agent performance, routing behavior, scheduling patterns, and operational gaps.
- Create Python, VBA, Excel, and Power Query automations that clean, transform, validate, segment, and distribute large operational datasets, reducing repetitive manual work and improving reporting consistency.
- Reconcile records across source systems, audit duplicate and conversion logic, and document validation rules so reporting aligns with agreed source-of-truth definitions.
- Partner with admissions, operations, and technical stakeholders to clarify analytical questions, explain findings, and convert analysis into practical workflow and process improvements.

Senior Admissions Guide / Manager on Duty | Full Sail University | 2021-2024

- Supported daily admissions and contact-center operations in a high-volume environment, including performance tracking, escalation handling, workflow troubleshooting, and manager-on-duty coverage.
- Partnered across teams to resolve operational issues, maintain service continuity, communicate performance needs, and support improvement initiatives while managing core responsibilities.

SELECTED ANALYTICS PROJECTS

Lead Conversion Modeling - Built and evaluated Python classification models for lead-conversion prioritization, comparing model performance with accuracy, precision, recall, F1, ROC-AUC, and cross-validation; produced conversion probabilities and High/Medium/Low priority outputs.

Contact-Center Transfer Analysis - Designed SQL audit logic using multi-source joins, date-window rules, deduplication, and window functions to reconcile lead insertions with qualifying Salesforce transfer activity and support operational performance measurement.

Automated Dialer & Reporting Workflows - Developed repeatable data-cleaning, segmentation, scheduling, validation, and reporting workflows using Python, SQL, Excel, VBA, Power Query, and Tableau.

EDUCATION

Data Science Master Certificate | Full Sail University | 2026

Bachelor of Science in Computer Science | Full Sail University | 2024
